*Are Your Files on*

## **The Society of American Bacteriologists**

*Complete and Up-to-date?*

### **BACTERIOLOGICAL PROCEEDINGS**

Because of the pressure for space, the abstracts of the papers presented at the annual meetings of the Society have not been published in the *Journal of Bacteriology* since 1947. They have been printed separately under the title "Bacteriological Proceedings", and were distributed in 1948 (Minneapolis meeting) and 1949 (Cincinnati meeting) only to those registered at the meetings. In 1950 (Baltimore meeting), the Proceedings were sent only to members of the Society. A limited number of extra copies for these three years (1948, 1949, and 1950) is still available. These are now offered for sale to libraries and to others who wish to keep their files complete. The price is \$1.00 per copy, the same rate charged to members of the Society.

### **1950 DIRECTORY OF THE S. A. B.**

A Directory of the Society's 4000 members was compiled and published in 1950. For the first time, certain professional data are recorded for each member: the highest degree obtained, the institution from which it was received, the year in which it was awarded, and the present professional affiliation (including title and name and address of the institution or firm). Copies of the Directory are available to non-members at \$5.00 each.

### **CHRONICLES OF THE S. A. B.**

In connection with the celebration of the Golden Anniversary of the Society at its annual meeting in 1950, Dr. Barnett Cohen, our Archivist, prepared an account of the inception and growth of the Society, entitled *Chronicles of the Society of American Bacteriologists*. In addition to describing the founding, development and present scope of the Society, the attractive 83-page board-covered book contains pictures of each of the 51 distinguished bacteriologists who have served as president. The *Chronicles* have aroused widespread interest and the Society has received numerous inquiries as to their availability. The remaining copies are now offered for sale at \$2.00 each.

Any or all of the above volumes will add immeasurably to the value of your file on the Society of American Bacteriologists. Use the convenient form below to order your selections. We regret that we cannot allow discounts, and that we must ask that payment accompany the order.

# BACTERIOLOGICAL REVIEWS

*Manuscripts* should be sent to Prof. Barnett Cohen, 710 N. Washington St., Baltimore, Md. *One hundred reprints*, without covers, of articles will be furnished gratis to contributors when ordered in advance. A table showing cost of additional reprints, with an order slip, is sent with proof.

*Correspondence concerning business matters* should be addressed to The Williams & Wilkins Company, Mount Royal and Guilford Avenues, Baltimore, U. S. A.

BACTERIOLOGICAL REVIEWS is issued quarterly in March, June, September, and December. The four numbers published in one calendar year constitute a volume.

The subscription price is \$5.00 per volume. For countries outside the Postal Union, add 50 cents a volume. Bacteriological Reviews is delivered free, however, to all subscribers to the Journal of Bacteriology.

*Claims for copies lost* in the mails must be received within 30 days (domestic). Changes of address must be received within two weeks of the date of issue.

*Subscriptions should be renewed promptly*—To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

## THE WILLIAMS & WILKINS COMPANY

*Publishers of Scientific Books and Periodicals*

BALTIMORE, U. S. A.

## ***Note to Contributors***

*Bacteriological Reviews* is published under the auspices of the Society of American Bacteriologists to provide authoritative, critical surveys on the current status of subjects and problems in the diverse fields of microbiology. This includes the occasional short monograph that cannot be published economically in the Monograph series of the Society.

Suggestions for timely reviews are solicited; and prospective authors are invited to discuss with the Editor the suitability of their proposed manuscripts. The submittal of a synopsis or topical outline for an advisory opinion is recommended. In addition, the following suggestions may serve as a general guide.

*Plan and Content of Review.* A rational, balanced development of the topic, rather than a chronological treatment, is to be preferred. Old history, if any, may be covered usually by simple reference to earlier reviews. A mere compilation or annotated bibliography does not adequately serve the objectives of this journal. The extensive presentation of new experimental material belongs properly in the domain of the monograph or of the appropriate "experimental" journal.

*References.* Judicious selection of references is an important function of the reviewer. Cited references should be listed alphabetically according to author and numbered serially, the numbers being used in the text. The full title of each paper should be given. Each citation should be checked with the original publication to avoid embarrassing errors. The system used in *Chemical Abstracts* for abbreviations of journal names should be followed.

*Length.* The length of a paper is no measure of its quality, and it is only the latter that determines acceptability for publication. However, practical considerations make it desirable to set a provisional limit of 30 to 40 printed pages for a review, text, tables, figures and references included. (About 10,000 words go into 20 pages; 24 references per page.) A short monograph must come within the size of a single issue, about 100 pages.

The acceptability of a review cannot, of course, be finally decided until the finished product has been examined. In the case of a short monograph, acceptance is also contingent upon the advice of the Editors-in-Chief of the Monograph series and of the *Journal of Bacteriology*.

Correspondence relating to editorial matters should be addressed to the Editor:
